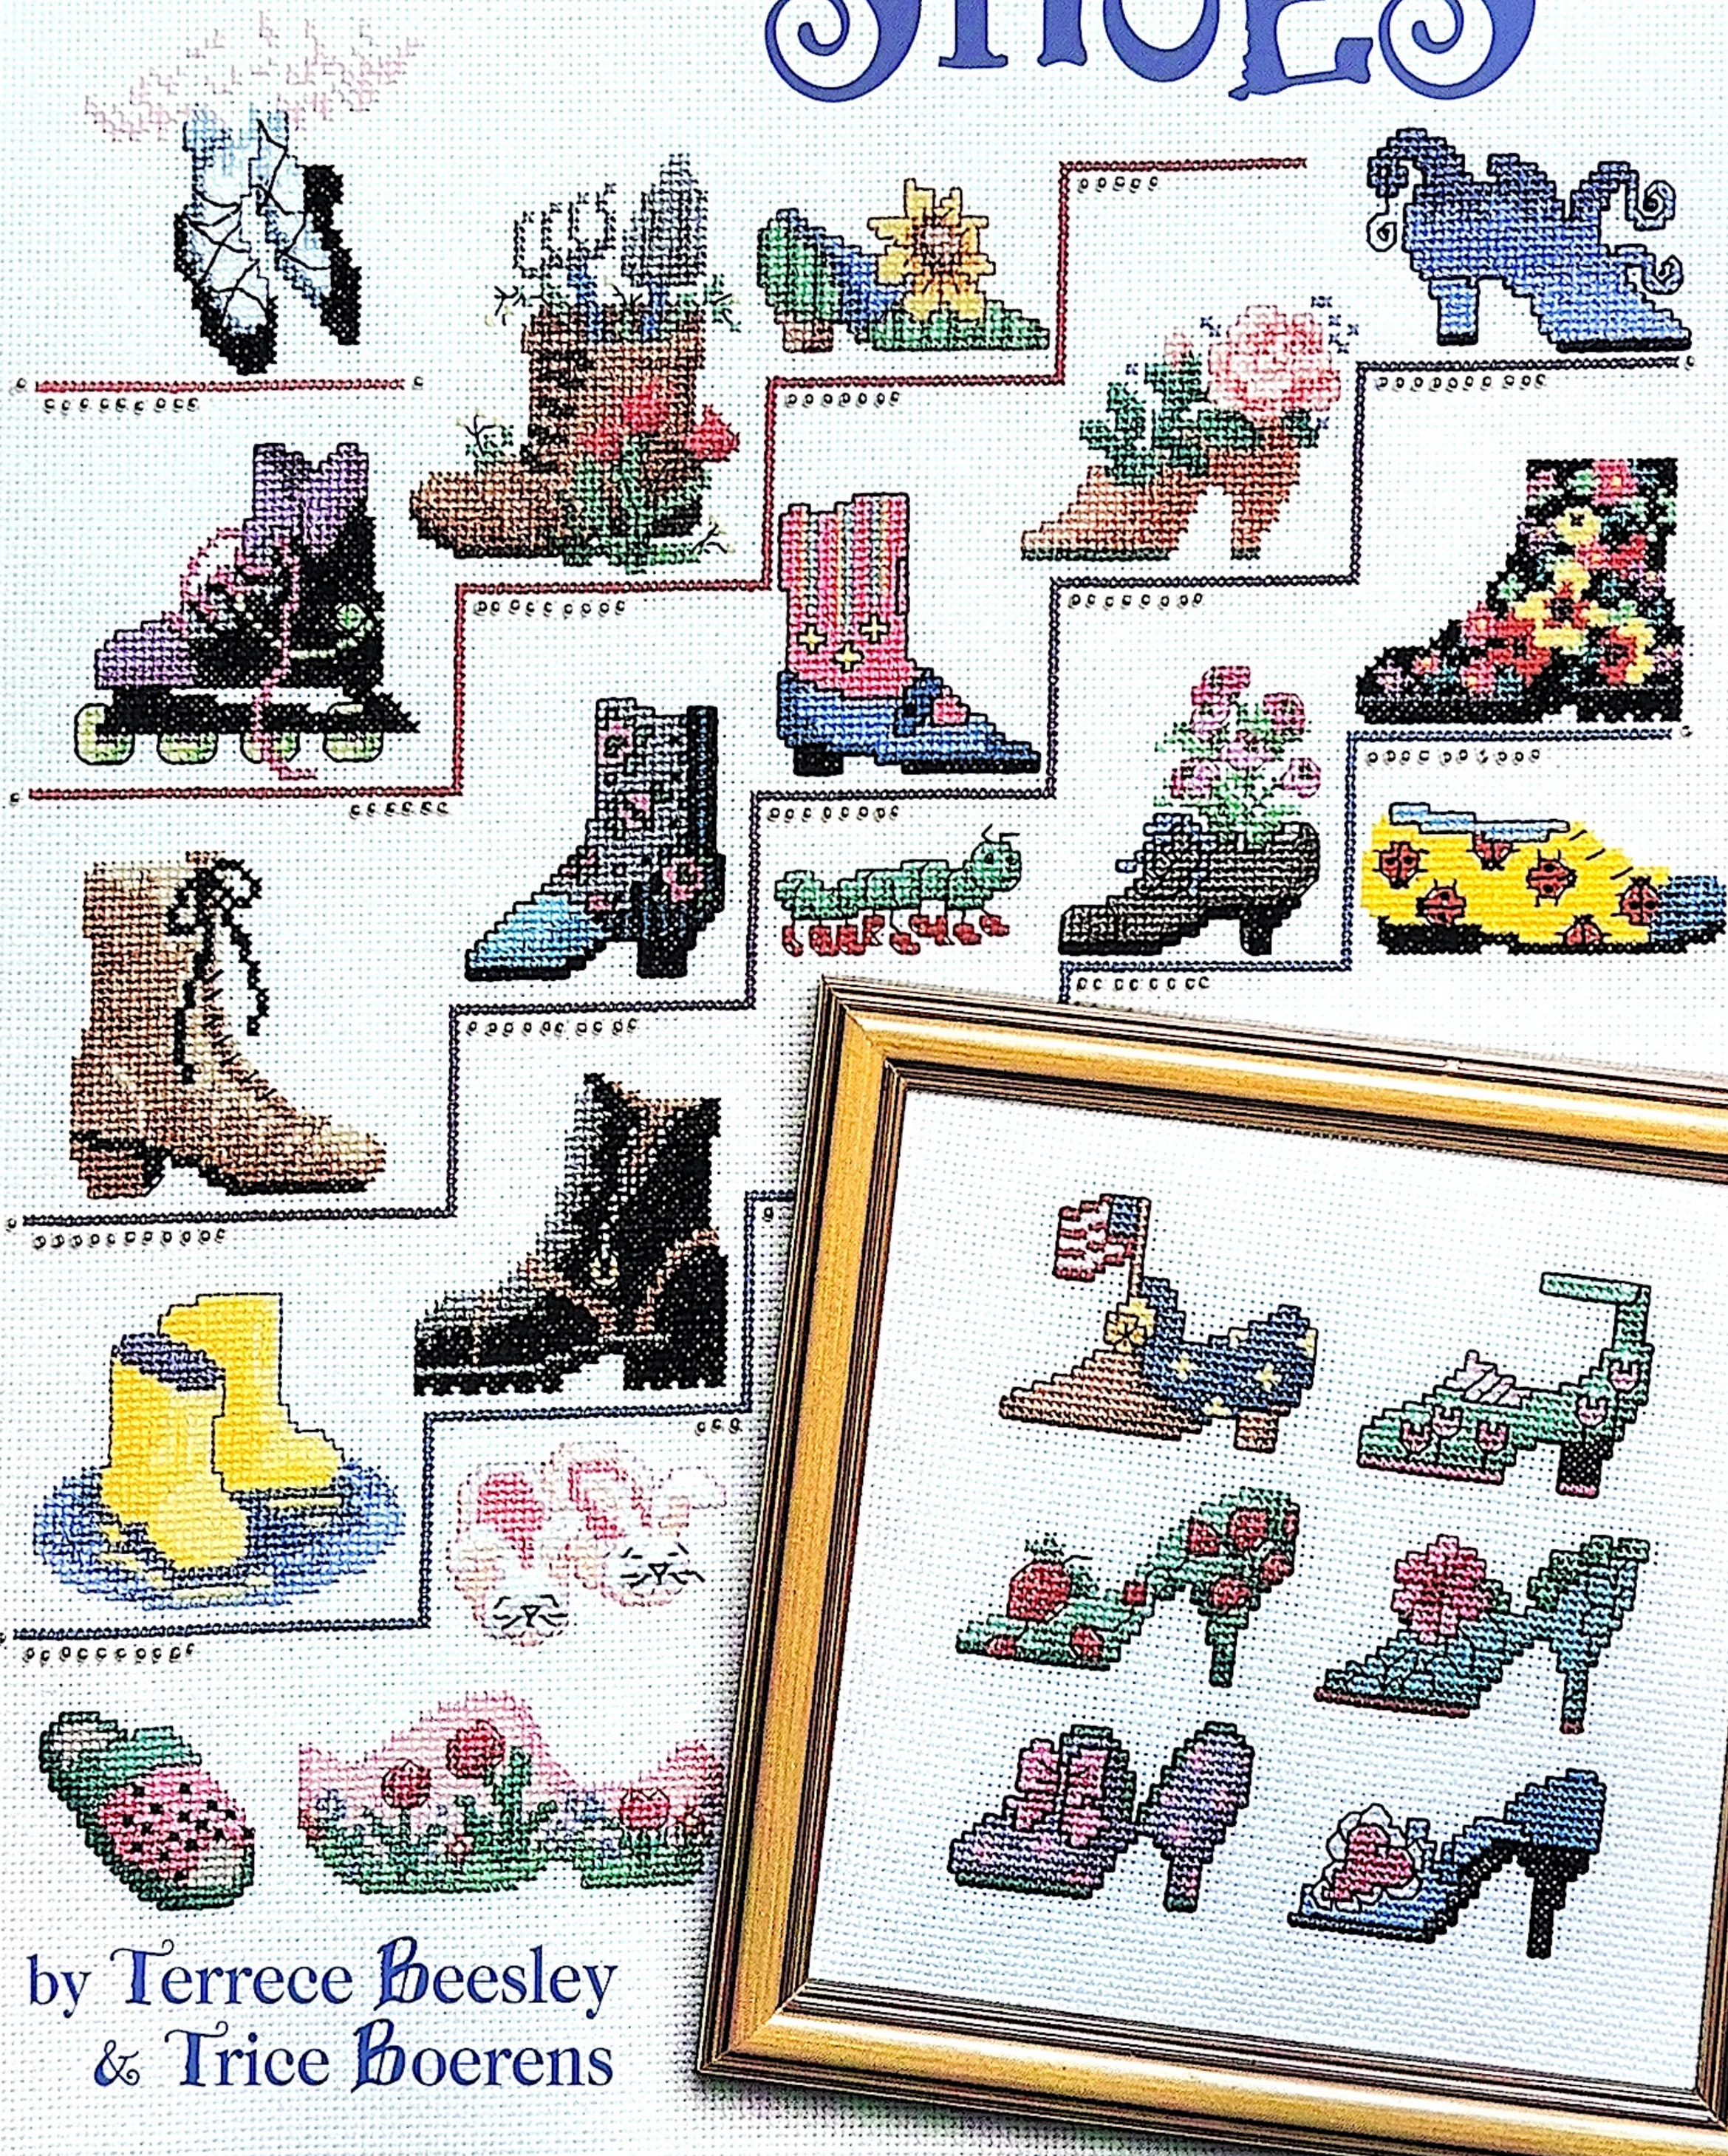
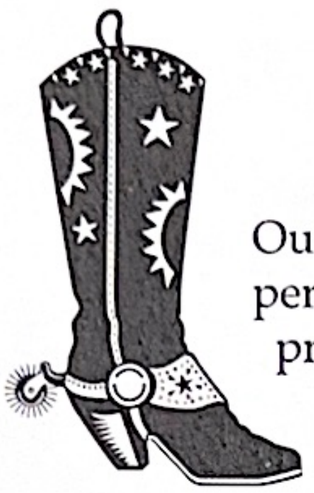
50 SHOES



by Terrece Beesley
& Trice Boerens

Bobbie Matela, Managing Editor
Carol Wilson Mansfield, Art Director
Carly Poggemeyer, Editorial Director
Jane Cannon Meyers, Editor
Ann Harnden and Pam Nichols, Associate Editors
Mary Hernandez, Book Design
Rick Causee, Lynda Cline, and Brent Rathburn, Charts

Photographed models were stitched by:
Barbara Chancy, Pam Nichols, Carly Poggemeyer, and Carrie Snider.



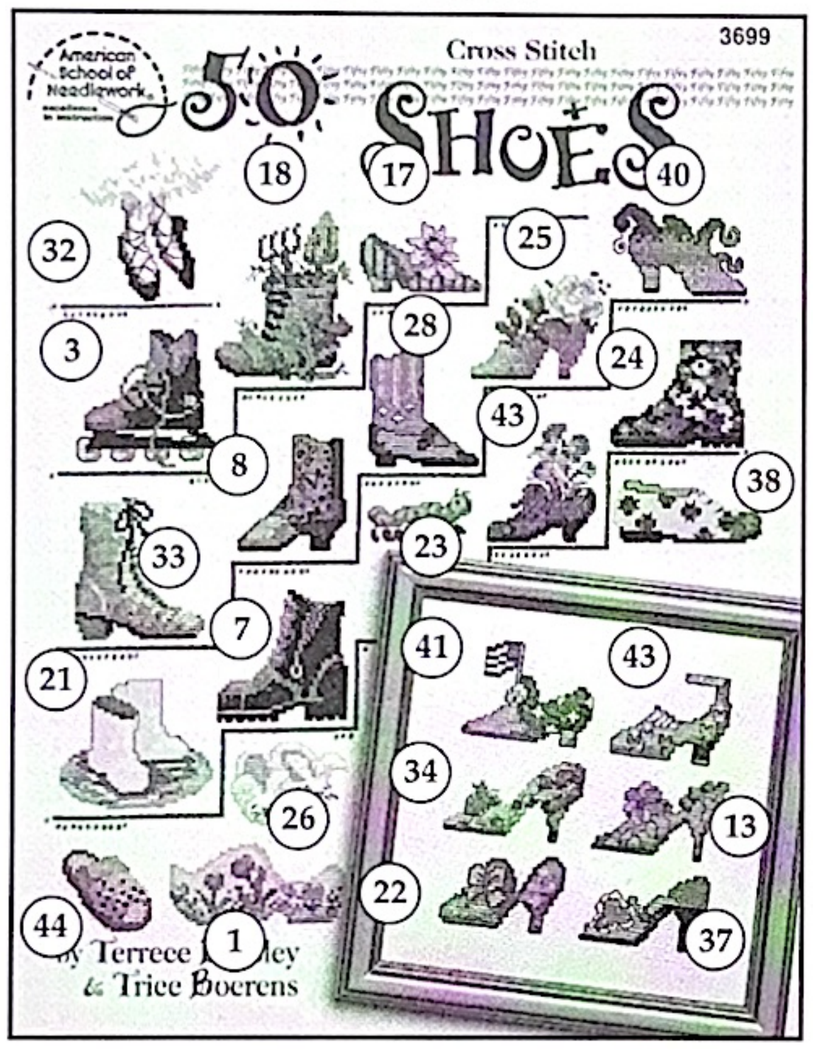
INTRODUCTION

Our feet are the oldest, most dependable mode of transportation. We recently read that an average person takes about 8,000 steps per day. Another interesting foot note states that in our lifetime, we probably walk about 115,000 miles—that's about halfway to the moon.

This dependence on our feet may give us a hint as to why we have developed into a civilization that enjoys having a wardrobe of shoes. We have special shoes for sports, shoes for dress, shoes for business, shoes for the beach, even shoes for at home (slippers).

Throughout history, people have protected and dressed their feet with the foot fashions of the day. This collection of **50 Shoes** includes some of the most interesting shoes from historical archives as well as cute, clever designs that we enjoy wearing today. We wish you many enjoyable hours of stitching your favorite shoe styles!

Front Cover



The design charts are in numerical order beginning on page 2.

GENERAL DIRECTIONS

CHARTED DESIGNS

These clever shoe designs can be cross stitched on any evenweave fabric (described below). Each square on a charted design corresponds to a space for a cross stitch on the stitching surface. The symbol in a square specifies the color to be used for that stitch as noted in the color key. If a color name is given without a symbol, the color is used for one of the following decorative stitches.

Backstitches and straight stitches are shown by straight lines and French knots by dots. The design stitch width and height are given and centers are shown by arrows.

FABRIC

The term "evenweave" means that the fabric has the same number of threads (or square blocks of threads) per inch, horizontally and vertically. That number is called its thread count. The stitched size of a design depends not only on the number of stitches required, but on the thread count of the chosen fabric. Use the chart below as a guide to determine the finished height and width of any design on three popular fabric counts.

Thread Count	Number of Stitches in Design				
	10	20	30	40	50
14 per inch	3/4"	1 3/8"	2 1/8"	2 7/8"	3 5/8"
16 per inch	5/8"	1 1/4"	1 7/8"	2 1/2"	3 1/8"
18 per inch	1/2"	1 1/8"	1 5/8"	2 1/4"	2 3/4"
	(measurements are given to the nearest 1/8")				

THREADS and NEEDLES

Our cover designs were stitched with Anchor embroidery floss, but we also give the floss numbers for Coats and DMC. Each company has its own color range, so these suggestions are not perfect color matches, but are appropriate substitutions. Generic color names are given for each floss color in a design; for example, if there is only one green it will be so named, but if there are three greens, they will be labelled lt (light), med (medium), and dk (dark).

Cut floss into comfortable working lengths—we suggest about 18". Two strands of floss are usually used to cross stitch on a 14-count background. For a more solid color effect, use two strands of floss on 16-count Aida (as shown on our cover stitching). One strand of floss is sufficient to cross stitch on 18-count fabric. Size 24 or 26 blunt-pointed tapestry needles are suitable for these fabrics.

GETTING STARTED

To begin in an unstitched area, bring threaded needle to front of fabric. Hold an inch of the end against the back, then anchor it with your first few stitches. To end threads and begin new ones next to existing stitches, weave through the backs of several stitches.

FINISHING

Wash stitched fabric in cool water with a gentle soap. Rinse well. Roll in a towel and squeeze out excess moisture. Place face down on a dry towel or padded surface and iron carefully. Frame or finish as desired.

THE STITCHES

Note: Use two strands of floss for all cross stitches and French knots and one strand for backstitches and straight stitches unless otherwise noted in the color key.

Cross Stitch

The cross stitch is formed in two motions. Follow the numbering in **Fig 1** and bring needle up at 1, down at 2, up at 3, down at 4, to complete the stitch. Work horizontal rows of stitches, **Fig 2**, wherever possible. Bring thread up at 1, work half of each stitch across the row, then complete the stitches on your return.

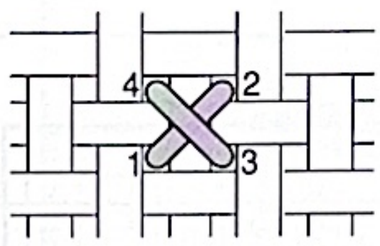

Fig 1

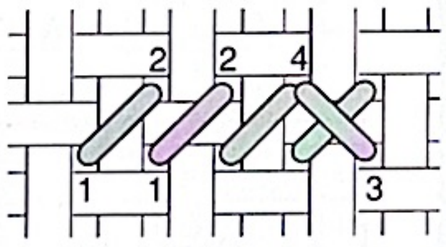

Fig 2

Backstitch

Backstitches are worked after cross stitches have been completed. They may slope in any direction and are occasionally worked over more than one square of fabric. **Fig 3** shows the progression of several stitches; bring thread up at odd numbers and down at even numbers.

Sometimes you have to choose where to end one backstitch color and begin the next color. As a rule of thumb, choose the object that should appear closest to you. Backstitch around that shape with the appropriate color, then backstitch the areas behind it with adjacent color(s).

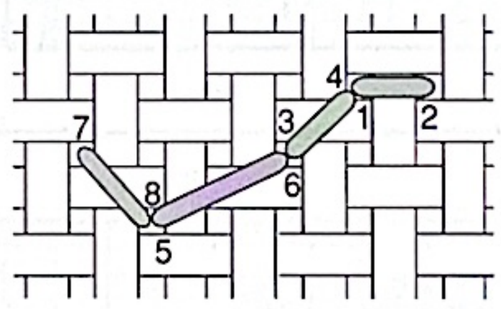

Fig 3

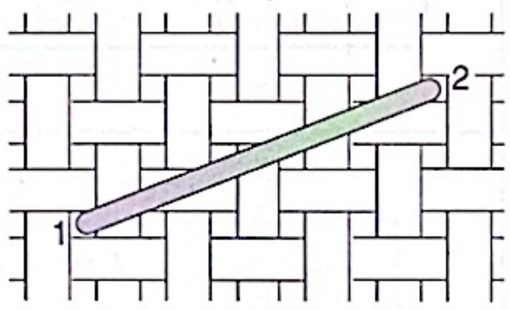

Fig 4

Straight Stitch

A straight stitch, **Fig 4**, is made like a long backstitch. Come up at one end of the stitch and down at the other. The length and direction of these stitches will vary—follow the chart for exact placement.

French Knot

Bring thread up where indicated on chart. Wrap floss once around needle, **Fig 5**, and reinsert needle at 2, close to 1, but at least one fabric thread away from it. Hold wrapping thread tightly and pull needle through, releasing thread just as knot is formed. For a larger knot, use more strands of floss, but wrap only once.
